EDUCATION

Salisbury University

Salisbury, MD

Bachelor of Science in Computer Science with Minor in Mathematics, 3.67 GPA

May 2027

- Relevant Courses: Microcomputer Organization, Advanced Data Structures & Algorithm Analysis, Systems Software, Calculus I & II, Discrete Mathematics, Linear Algebra, Theory of Computation, Database Design & Implementation

CORE SKILLS

Languages: Java, Python, C++, C, Bash, R, JavaScript, PHP, MySQL

Web: RESTful APIs, HTML, CSS

Tools & Frameworks: VS Code, Git/GitHub, Linux (Ubuntu/WSL), NumPy, pandas, scikit-learn, PyTorch, ROS 2, YOLOv8

PROFESSIONAL EXPERIENCE

NASA Wallops Flight Facility – HESTO

Wallops Island, VA

Web Development & Database ELO Student (MDSGC)

June 2026 – Aug 2026

- Developing and improving web systems and database infrastructure supporting aerospace research operations at Wallops Flight Facility under the Maryland Space Grant Consortium.
- Designing and optimizing database schemas and queries to support mission-critical data workflows across research teams.
- Collaborating with engineering and research staff to deliver full-stack solutions aligned with NASA operational standards.

Real Robotics Lab, Salisbury University

Salisbury, MD

Robotics Lab Researcher

Feb 2026 – Present

- Built and integrated a perception stack for a Unitree G1 humanoid robot using Livox MID-360 LiDAR, YOLOv8 object detection, SLAM, and IMU-based obstacle avoidance for autonomous operation in construction environments.
- Compiled a custom Roboflow dataset of 1,052 annotated construction tool images (drills, hammers, paint rollers) sourced from 350+ original photos to train domain-specific detection models.
- Managed two-hop SSH networking to the robot's internal compute network and coordinated cross-functional integration of perception, mobility, and manipulation modules.

Maggs Recreation Center, Salisbury University

Salisbury, MD

Front Desk Assistant

Sept 2024 – Present

- Manage facility access control, member records, and day-to-day operations for a high-traffic university recreation center.

PROJECTS

SUClubs | PHP, MySQL, JavaScript, CSS – Full-Stack Web App

- Led a 5-person team as both project manager and primary developer building a full club lifecycle platform for Salisbury University, supporting club registration, membership management, e-board dashboards, and SGA approval workflows.
- Architected a multi-role system (public, e-board, SGA admin) with role-gated access control, session scoping, and IDOR defenses across all SQL queries and PHP endpoints.

AI Security Scanner | HoyaHacks 2026 – 1st Place, Best Use of Snowflake API

- Built a RAG-powered vulnerability scanner using Snowflake Cortex that detects prompt injection, SQL injection, hardcoded secrets and more by comparing code against vectorized NIST benchmarks.
- Delivered a Python/Streamlit web interface that explains risks in plain language and generates actionable remediation suggestions.

Machine Learning – Logistic Regression | Python, scikit-learn

- Designed and implemented a Logistic Regression classifier with performance analysis using NumPy, pandas, and scikit-learn, exploring model evaluation metrics and algorithm fundamentals.

LEADERSHIP & ACTIVITIES

Co-Founder & Organizer | GullHacks – Salisbury University's First Hackathon

Fall 2025 – Fall 2026

- Co-founding and managing all operations for a 250-participant, 24-hour hackathon (Nov 2026) with a \$35K–\$42K budget, including sponsorships, MLH partnership, catering, marketing, and website development.

Member, Delta Alpha Pi, Upsilon Pi Epsilon, Pi Mu Epsilon Honor Societies

Dean's List (Fall 2023 – Spring 2026)

Club Soccer Team Member (Fall 2023 – Present)
